DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The prior art documents submitted by the applicant in the Information Disclosure Statement filed on August 24, 2004 have all been considered and made of record (note the attached copy of form PTO-1449).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2874

6. **Claims 1-6 and 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Zhao et al. (U.S. Patent 6,782,154).**

7. Regarding claims 1-6 and 10-13, Zhao et al. discloses a noise reduction apparatus and method for signal light arranged in a transmission path of the signal light emitted from a fiber amplifier (i.e. fiber laser) in order to reduce noise of the signal light in optical communication. The noise reduction apparatus comprises single-walled carbon nanotubes, which inherently have optical non-linearity, provided on a transparent optical component (e.g. switch). See Abstract and column 11, lines 11-57. Furthermore, the functional language of claims 1, 3-5 and 10 does not distinguish the apparatus from the prior art. See MPEP 2114.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. **Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhao et al.**

10. Regarding claims 7-9, Zhao et al. does not expressly disclose the erbium-doped fiber amplifiers, semiconductor optical amplifiers, or semiconductor lasers. Erbium-doped fiber amplifiers, semiconductor optical amplifiers, or semiconductor lasers are all well known in the art. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select any appropriate any laser light source since Applicant has not disclosed that the type of laser solves any stated problem or is for any particular purpose.

Conclusion

11. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
